

Shared Care Record

Opening the HWE Shared Care Record:
Cerner Health Information Exchange (HIE)
from Cerner Millennium EPR

The screenshot shows the Cerner Millennium EPR interface. On the left is a dark blue sidebar menu with various clinical workflow options. The 'HIE' option is highlighted with a yellow rectangular box. A red arrow points from this box to a text box on the right. The main content area shows patient information for 'ZZZTEST, MR CORRES', including age (67 years), DOB (10/Oct/1954), and a list of care team members.

Open the patient record and select HIE (Health Information Exchange) from the clinical menu

You will now see the patient's Shared Care Record in the HIE as shown below with this Test Patient

The screenshot displays the Cerner HIE Shared Care Record for 'JORDAN, SARAH'. The interface includes a patient header with NHS number, gender, and birth date. Below this is a disclaimer and a summary report. The summary report is divided into several sections: Clinical Correspondence (8), Encounter Information (2), Blood Sciences (167/171), Radiology (6), Future Appointments (0), and Referrals (3). Each section contains a table of relevant data.

Report Name	Performed by	Date Completed	Source
Rheumatology Clinic Letter	Da Costa Mendes, Richard	06/01/2019 10:23:00 GMT	..3.57.3
